

1 Recommended Edits for Section 1.8 of 03-107r1

2 To: J3
3 From: Craig Dedo
4 Date: April 2, 2003
5 Subject: Recommended Edits for Section 1.8 of 03-107r1

6 JOR reviewed the changes recommended in section 1.8 of paper 03-107r1. JOR recommends
7 making all of the indicated changes, except for the two that are noted.

8 1.8 Changes recommended for Section 9

9 Most of the following changes were proposed in paper 02-283r1 at J3 meeting 163.17

10 [192:6] Change “re-applied ” to “reapplied ”.

11 [194:25] **Do not** change “ID=specifier” to “identifier (9.5.1.8)”.

12 [202:28] Change “specifer ” to “specifier ”.

13 [203:16-17] Delete “or dummy procedure pointer”. Insert “to ”between “or” and “a” at [203:17].

14 [211:30-31] Delete sentence “The value ... specified unit.”

15 [214:16] Insert “=” after “IOLENGTH ”.

16 [190:14-15] Replace the sentence “This specifier may ... access.” with the following sentence:“This
17 specifier may appear in a data transfer statement only if the statement specifies a
18 unit connected for stream access.”

19 [207:11-12] Delete the word starting with “or” and replace with, “or a processor-dependent
20 negative value if the flush operation is not supported for the unit specified ”.

21 [207:12+] Delete Note 9.57.

22 [188:8+] **Do not** make the following edit.

23 Insert:

24 C929a (R914) If *default-char-expr* is an initialization expression (7.1.7),the leading
25 part of its value shall be a valid *format-specification*.
