Subject: Comments on Clause 1
From: Van Snyder

1   Edits

Edits refer to 07-007r1. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

[Editor: Replace "determining" by "specifying" since NUM_IMAGES can determine the number of   2:3
images.]

The semantics of facilities that are identified as **processor dependent** are not completely specified by   3:2-4
\thisstandard. They shall be provided, with methods or semantics defined by the processor.

[The syntax of .XOR. is the same as that of a user-defined unary operator of the same form. Editor: 3:17
Replace "a different syntax from that" by "cannot be used in place".]

[Editor: Replace "Csn" by "Csnn".]   6:2

[Editor: Delete "the".]   7:9

[Editor: Replace "Better ... 95" by "From Fortran 90 onward" to include Fortran 2003 (and later 2008)   7:25
without needing to list them all.]

[This is a weird mixture of past and future tense. Editor: Replace "has become" by "becomes".]   7:29
