

Subject: Comments on Clause 3
 From: Van Snyder

1 Edits

Edits refer to 07-007r1. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

6	[Editor: Replace “occur” with “appear”.]	31:21
7	[Editor: Replace “occur” with “appear”.]	32:13
8	[Editor: Replace “occur” with “appear”.]	33:33
9	[Editor: Replace “continuing” with “continuation” (cf. [34:29]).]	35:0+3
10	[Editor: Insert “(5.3.2)” after “attribute”.]	35:15
11	[Editor: Replace “ <i>macro-variable-decl-stmt</i> ” with “R320”.]	35:23
12	[Editor: Insert “of type integer” after “variable”.]	36:17
13	[Editor: Delete the blank line.]	37:4
14	[Editor: Replace “token” with “ <i>result-token</i> ” twice (cf. [37:10]).]	37:11
15	[Editor: Insert a left bracket before “ <i>result-token</i> ”.]	37:7
16	[Editor: Replace “macro ... host association” by “previously defined macro” (cf. [60:6]).]	38:2-3
17	[Editor: Insert a paragraph:]	39:7+
18	If a macro actual argument is not preceded by <i>macro-dummy-name</i> it corresponds to the macro dummy	
19	argument in the same position in the macro declaration. Otherwise it corresponds to the macro dummy	
20	argument having the specified name.	
21	[Editor: Insert a paragraph:]	39:19+
22	A macro dummy argument is not present if it does not correspond to a macro actual argument, or if it	
23	corresponds to a macro actual argument that is not present. Otherwise it is present.	
24	[Editor: Delete “that was”. Replace “it has never been assigned to” with “no tokens are assigned to it”	39:28-29
25	(maybe a token was assigned to it last week in some other expansion).]	
26	[Editor: Replace “continuation generation” with “macro continuation”.]	40:5
27	[Editor: Replace “All” by “Each”, replace “produce” by “produces a”, and replace “statements” by	40:8
28	“statement” twice, lest the impression be left that an “other macro body statement” could on its own	
29	produce several Fortran statements.]	
30	[Editor: “loop_over_temp%i” needs another “%”.]	41:7+14

2 Questions without answers

32	Do we want DEFINE MACRO” in the list?	32:2+
33	In light of C323 at [38:5-6], do we need C326-C328?	38:11-18
34	Do we need MACRO EXIT and MACRO CYCLE, and labels for MACRO DO and MACRO IF con-	40:32+
35	structs?
