Subject: Section titles in 9.5.1
From: Van Snyder

1 Introduction

In the sections in chapter 9 concerned with OPEN, CLOSE, WAIT and file positioning, the subsections describing specifiers all have titles like "The STATUS= specifier in the CLOSE statement" In 9.5.1 (data transfer statements), the style is different. This paper proposes to change them to the same style as elsewhere.

2 Edits

Edits refer to 00-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.
