Subject: Delete identical syntax rule
From: Van Snyder

1 Introduction

The rules for syntax terms *rename* and *only-rename* are identical. There are no constraints on either of them. There is only one use of *only-rename* in a syntax rule, and only one use of *only-rename* in the text – preceeded by "*rename* or"! This paper proposes to replace usages of *only-rename* by *rename* and delete the rule for *only-rename*.

2 Edits

Edits refer to 00-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

[Editor: Delete "*only-*" – the only reference to *only-rename* in a syntax rule becomes *rename*.]	238:41
[Editor: Delete syntax rule R1113 – the rule that defines *only-rename*.]	239:1-3
[Editor: Delete "or *only-rename*" – the first of only two references in the text, according to grep.]	239:27-28
[Editor: Delete "or *only-rename*" – the second of only two references in the text, according to grep.]	239:30
