Subject: Issues 277-279
From: Van Snyder

1 Introduction

Issues 277-279 are concerned with problems in the discussion of main program arguments.

2 Edits

Edits refer to 00-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

[Editor: Delete issue 277.]	236:19-25
If a main program argument is a default character scalar it is the command program argument. It shall have assumed length.	236:28-29
If a main program argument is a default character array of rank one, it is the argument text program argument. It shall have assumed length, assumed shape, and an explicit lower bound of zero.	236:33-34
[Editor: Delete issue 278.]	236:35-42
[Editor: Replace "The processor ... program argument" by "The processor shall assign to the argument text program argument a representation of the command name and the command arguments".]	237:1-2
[Editor: Delete issue 279.]	237:4-10
If a main program argument is a default integer array of rank one it is the argument length program argument. It shall have assumed shape, and an explicit lower bound of zero.	237:14-15
