Additional Normative References

Subject: Additional Normative References

Rationale

In looking through the ISO C standard, I noticed that there are several additional normative references listed that appear to be relevant to the Fortran standard as well. We should add them to the list in section 1.8.

Technical Specification and Syntax

Add ISO standards 31, 2382, and 4217 to the list in section 1.8. Reorder the list in numerical order by standard number, regardless of the issuing authority.

Edits

Edits refer to the 01-007.

[7:7-18] Reorder the list in numerical order by standard number, regardless of the authority issuing the standard. The standards in the list should be in the following order:

ISO/IEC 646:1991
ISO 8601:1988
ISO/IEC 9899:1999
ISO/IEC 10646-1:2000
IEC 60559 (1989-01)

References

01-007, Fortran 2000 Draft
ISO/IEC 9899:1999(E), International Standard - Programming Languages - C
