1 Introduction

J3 internal note

Unresolved issue 361 Item 12 of paper 02-138r2 added the above reference to "this module", along with one other simillar reference in this section and two in 14.7. However, the referent for "this" is unclear. Three intrinsic modules are defined in Section 14. One of the references is even in a sentence that begins by specifying two of the three modules, making the referent particularly confusing. I'll suggest that at least in the above case, this could be fixed just by removing material. It is in a clause introduced by "examples are," which implies that the list is incomplete (and it's implication is correct).

Subgroup has decided to replace "this module" by "an intrinsic module." This change covers the case addressed by the unresolved issue note, and potentially simplifies future maintenance.

2 Edits

Edits refer to 02-007r1. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.
