Subject: Typos in the CD

The following are fixes for typos, spelling errors, and similarly trivial errors in the CD. All page/line references are to 02-007r3, aka the CD. Other people have pointed these out to me; I make no attempt at attribution here.

[56:Note 4.50 last line] "END FUNCTION POINT_3D" ->
"END FUNCTION POINT_3D_LENGTH" [202:28] specifer -> specifier [350:9] depedent -> dependent [377:Note 14.12] "LOGICAL MATRIX_ERROR = .FALSE." ->
"LOGICAL :: MATRIX_ERROR = .FALSE."
(One could argue for other colons in this and the subsequent note, but that is a style question. This one is an error).
