1 Edits

Edits refer to 07-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

(6) Printing. 519:32+

In FORTRAN 77, and also for consistency in Fortran 90, formatted output to certain units resulted in the first character of each record being interpreted as controlling vertical spacing. There was no standard way to detect whether output to a unit resulted in this vertical format control, and no way to specify that it should be applied; this has been deleted. The effect can be achieved by post-processing a formatted file.

[Editor: Replace "char-length" by "*char-length*".] 521:22
