1 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

Change bars show changes between 99-185r3 and 99-185r4.

[Editor: Add a new paragraph.] 82:2+

If a pointer is associated, the values of its deferred type parameters are the same as the values of the corresponding type parameters of its target.

If *target* is not a disassociated pointer, all nondeferred type parameters of the declared type of *pointer-object* shall have the same values as the corresponding type parameters of *target*. Otherwise, all nondeferred type parameters of the declared type of *pointer-object* that correspond to nondeferred type parameters of *target* shall have the same values as the corresponding type parameters of target. 156:11-31

[Editor: Replace "when it is invoked" by:] 156:34

, if it returns an allocated allocatable result or an associated pointer result.

[Editor: delete.] 156:37-48
