Subject: Issues 62 and 21
From: Van Snyder

# 1 Introduction

Issue 62 notices that the description of accessibility of type components doesn't account for mixed public and private components. Issue 21 asks whether the description of the scope of a component name is wrong. It is. It also asks whether the descriptions of the scope of a type parameter name and a binding name were introduced correctly. They were.

# 2 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [ and ] in the text.
