Subject: Issue 201
From: Van Snyder

1 Introduction

A cross reference to events that cause targets to become undefined is dangling as a result of edits to section 14.7.6. It seems that essentially all of 14.7.6 is applicable, so the "item (?) of" part can simply be deleted.

2 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.
