Subject: Issue 202
From: Van Snyder

1 Discussion

In issue 202, the editor asks whether a procedure declaration statement is the correct entity to which to impute specification of characteristics of a procedure pointer, rather than to an interface block, and whether the word "previous" is appropriate. The procedure declaration statement is the correct specification, and "previous" is not appropriate.

2 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

[Editor: Replace "previous interface block" by "procedure declaration statement (12.3.2.3)".]	266:1
[Editor: Delete.]	266:3-18
