Subject: Comments on SELECT TYPE
From: Van Snyder

1 Edits

Edits refer to 00-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + (-) indicates that immediately following text is to be inserted after (before) the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

Essentially everything is changed since 00-104.

[Editor: Add a new sentence within the constraint:] 152:36

The *extensible-type-name* shall name a type that is an extension of the declared type of the *type-selector*.

Note 8.10$\frac{1}{2}$ 153:32+

If the declared type of the *type-selector* is T, specifying TYPE DEFAULT has the same effect as specifying TYPE IN (T).
