Subject: Delete identical syntax rule
From: Van Snyder

1 Introduction

The rules for syntax terms *rename* and *only-rename* are identical. There are no constraints on either of them. There is only use of *only-rename* in a syntax rule, and only use of *only-rename* in the text – preceeded by "*rename* or"! This paper proposes to replace usages of *only-rename* by *rename* and delete the rule for *only-rename*.

2 Edits

Edits refer to 00-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + (-) indicates that immediately following text is to be inserted after (before) the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

[Editor: Delete "*only-*" – the only reference to *only-rename* in a syntax rule becomes *rename*.] 238:41

[Editor: Delete syntax rule R1113 – the rule that defines *only-rename*.] 239:1-3

[Editor: Delete "or *only-rename*" – the only reference in the text, according to grep.] 239:30
