Subject: Issue 273, and other work on passed-object dummy arguments
From: Van Snyder

1 Introduction

At meeting 153, /data thought a constraint was an inappropriate place for a definition, so we moved the definition of passed-object dummy arguments from the constraints in 4.5.1 (at [43:7-10, 43:25-28 and 43:38-42]) to a new section 4.5.1.6. We overlooked that there remained two constraints on page 43 that referred to the passed-object dummy argument, for which the definition is now several pages distant, and forward.

Issue 273 finds the newly-introduced wording in 4.5.1.6 confusing.

2 Edits

Edits refer to 00-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + (-) indicates that immediately following text is to be inserted after (before) the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.
