1 Edits

Edits refer to 01-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + (-) indicates that immediately following text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

[Duplicates 16.1.1. Editor: disembolden “**program name**” and remove it from the index (because the term is never used again). Then move the entire paragraph into note 11.1, combining it with [231:27] to form a single paragraph.] 231:23-25

[Editor: Remove the reference “(R204)” because the term “*specification-part*” is so fundamental that if it is not understood by now the reader has deeper problems than not finding it (and it is in the index).] 232:31

[Duplicates 16.1.1. Editor: Insert “(16.1.1)” after “program. Then make the entire paragraph a note.] 232:35-37

[Editor: Move to [235:12+]. Where it is, it splits “local identifier” from a reference “such a local identifier” to it.] 235:3-7
