

Subject: Comments on Section 5, Unresolved issue 348
 From: Van Snyder

1 Edits

Edits refer to 02-007. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

[Editor: The extra spaces before PRIVATE and PUBLIC probably result because the two consecutive index entries have a blank between them. Try taking out the blank. Also, maybe use `\mindex*` instead of stating the text and indexing it separately with `\mindex`.] 72:9-11

[The “specified in a module or accessible in a module by USE association” phrase is in the wrong place. It needs to apply to “Identifiers without an explicitly specified *access-spec*...” Otherwise that sentence could apply to any identifier anywhere. Need to make it apply only to entities declared in the scoping unit of the module, or accessible there by use association. The “are declared to” part is too wordy.] 72:9-12

[Editor: Delete “are specified ... to” and “are declared to”.] 72:9-11

[Editor: “Identifiers ... accessibility” \Rightarrow “Identifiers specified in a module or accessible in a module by USE association, and for which an *access-spec* is not explicitly specified in that module, have default accessibility from that module”.] 72:12

[Editor: Replace unresolved issue note 348:] 72:13+

NOTE 5.7 $\frac{1}{2}$

In order for an identifier to be accessed by USE association, it must have the PUBLIC attribute in the module from which it is accessed. It can nonetheless have the PRIVATE attribute in a module in which it is accessed by USE association, and therefore not be available for USE association from that module.

[Editor: “This statement” \Rightarrow “The `\mindex{statements!PROTECTED}\tdef{PROTECTED statement}`”, i.e., name it (instead of saying “this”), make it bold, and put it in the index two ways. This replaces the two index entries at lines 1692-1693 of `c05.tex`. Compare to line 1150 of `c05.tex`.] 87:3
