Subject: Comments on 2.2.3.4
From: Van Snyder

1 Introduction

Part of 2.2.3.4 is about interface blocks, and part is about interface bodies. The part about interface blocks isn't quite right – it overlooks the module procedure statement.

2 Edits

Edits refer to 02-007r1. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by associated text, while a page and line number followed by + (-) indicates that associated text is to be inserted after (before) the indicated line. Remarks are noted in the margin, or appear between [and] in the text.

2.2.3.4 Interface bodies and interface blocks 13:3-6

An **interface body** describes a procedure interface. The name of an interface body may be used to specify the interface of a dummy procedure, external procedure, procedure pointer, or type-bound procedure.

An **interface block** is either a specific interface block or a generic interface block. A specific interface block is simply a collection of interface bodies. A generic interface block may also be used
