Recommended Edits for Section 1.8 of 03-107r1

To: J3
From: Craig Dedo
Date: April 2, 2003
Subject: Recommended Edits for Section 1.8 of 03-107r1

JOR reviewed the changes recommended in section 1.8 of paper 03-107r1. JOR recommends making all of the indicated changes, except for the two that are noted.

1.8 Changes recommended for Section 9

Most of the following changes were proposed in paper 02-283r1 at J3 meeting 163.17

[192:6] Change "re-applied " to "reapplied ".

[194:25] ***Do not*** change "ID=specifier" to "identifier (9.5.1.8)".

[202:28] Change "specifer " to "specifier ".

[203:16-17] Delete "or dummy procedure pointer". Insert "to "between "or" and "a" at [203:17].

[211:30-31] Delete sentence "The value ... specified unit."

[214:16] Insert "=" after "IOLENGTH ".

[190:14-15] Replace the sentence "This specifier may ... access." with the following sentence:"This specifier may appear in a data transfer statement only if the statement specifies a unit connected for stream access."

[207:11-12] Delete the word starting with "or" and replace with, "or a processor-dependent negative value if the flush operation is not supported for the unit specified ".

[207:12+] Delete Note 9.57.

[188:8+] ***Do not*** make the following edit.
Insert:
C929a (R914) If *default-char-expr* is an initialization expression (7.1.7),the leading part of its value shall be a valid *format-specification* .
