Subject: More minor stuff about allocation
From: Van Snyder

1 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

[Editor: Add "(5.1.2.9)" after "attribute".]	79:37
[Editor: Replace "space" by "it" and delete "for the ... (6.4.1)." (The existing sentence doesn't cover allocatable scalars, and it's easier to rely on the correct descriptions instead of duplicate them.)]	79:38-39
[Editor: Delete "by pointer ... (6.4.1)" because it doesn't cover argument association.]	80:4-5
