Subject: Issue 20 and related stuff
From: Van Snyder

1 Discussion

In issue 20 (155:20-33), the editor asks whether kind type parameters are checkable in the presence of polymorphism. As things now stand, the answer is yes, but the wording is unclear.

2 Edits

Edits refer to 99-007r2. Page and line numbers are displayed in the margin. Absent other instructions, a page and line number or line number range implies all of the indicated text is to be replaced by immediately following text, while a page and line number followed by + indicates that immediately following text is to be inserted after the indicated line. Remarks for the editor are noted in the margin, or appear between [and] in the text.

[Editor: Replace "kind type ... *pointer-object*" by "the corresponding kind type parameters of *pointer-object* and the target shall have the same values".] 155:18-19

[Editor: Delete the J3 note.] 155:20-33
